Video Segmentation and Its Applications

Video segmentation has become one of the core areas in visual signal processing research. The objective of *Video Segmentation and Its Applications* is to present the latest advances in video segmentation and analysis techniques while covering the theoretical approaches, real applications and methods being developed in the computer vision and video analysis community. The book will also provide researchers and practitioners a comprehensive understanding of state-of-the-art of video segmentation techniques and a resource for potential applications and successful practice.
